

KRIEGER CRAFTSMEN INC.

Krieger Craftsmen is a mold shop in western Michigan specializing in the manufacture and service of high-precision plastic injection molds for automotive tail lights, interior trim, electrical connectors, consumer appliances, and other small and medium size products.

Design & Engineering Concept to Completion

Krieger Craftsmen provides you complete design and engineering service, both for new molds and to service existing tools for engineering changes and performance enhancement.

Machining 5-axis CNC

Krieger Craftsmen has a complete array of in-house machining capabilities for high-speed productivity. Parts can tilt and rotate to any position for fewer setups and even simultaneous 5-axis contour milling. That means we keep control of your mold manufacturing to deliver you a better product on-time.

Continuous Investment OKK HM1000S

Krieger Craftsmen routinely invests in new technology and equipment to keep our craftsmen on the leading edge of productivity.

Efficiency Throughout FCS Fixturing

Fixturing is an important part of accuracy and productivity. Here you see our latest addition, the FCS system provides operator efficiency with “tenths” repeatability. Fully integrated across all departments.

Manufacturing Facility Concept to Completion

A new 20,000 sq. ft. facility is clean, spacious, well-lit and well-organized for productivity. We are equipped with three 5-ton capacity overhead cranes, forklift, stands, and all the tools to speed things along and ensure safe handling of precision mold components.

Service

Repair and engineering changes

Even the best molds need top-notch support, for unexpected repairs, scheduled maintenance, and engineering changes. Krieger Craftsmen is your partner for productivity, ready for the unexpected. From routine maintenance to complete renovations, we can help. We service what we build, as well as molds built by others.

Shown to the right is our laser welding system. Its pinpoint accuracy and wide selection of materials helps speed repairs and engineering changes.
